

(h) A phytosanitary certificate issued by MAFF and bearing the declaration, “These peppers were grown in registered greenhouses in Alicante or Almeria Province in Spain,” must accompany the shipment.

(Approved by the Office of Management and Budget under control number 0579–0210)

[63 FR 65656, Nov. 30, 1998, as amended at 68 FR 37922, June 25, 2003; 70 FR 72892, Dec. 8, 2005]

§ 319.56–2hh Conditions governing the entry of peppers from New Zealand.

Peppers from New Zealand may be imported into the United States only under the following conditions:

(a) The peppers must be grown in New Zealand in insect-proof greenhouses approved by the New Zealand Ministry of Agriculture and Forestry (MAF).

(b) The greenhouses must be equipped with double self-closing doors, and any vents or openings in the greenhouses (other than the double closing doors) must be covered with 0.6 mm screening in order to prevent the entry of pests into the greenhouse.

(c) The greenhouses must be examined periodically by MAF to ensure that the screens are intact.

(d) Each shipment of peppers must be accompanied by a phytosanitary certificate of inspection issued by MAF bearing the following declaration: “These peppers were grown in greenhouses in accordance with the conditions in § 319.56–2hh.”

[66 FR 45161, Aug. 28, 2001]

§ 319.56–2ii Administrative instructions: conditions governing the entry of mangoes from the Philippines.

Mangoes (fruit) (*Mangifera indica*) may be imported into the United States from the Philippines only under the following conditions:

(a) Mangoes grown on the island of Guimaras, which the Administrator has determined meet the criteria set forth in § 319.56–2(e)(4) and § 319.56–2(f) with regard to the mango seed weevil (*Sternonchetus mangiferae*), are eligible for importation into all areas of the United States. Mangoes from all other areas of the Philippines except Palawan are eligible for importation

into Hawaii and Guam only. Mangoes from Palawan are not eligible for importation into the United States.

(b) *Treatment.* The mangoes must be subjected to the following vapor heat treatment for fruit flies of the genus *Bactrocera*. The treatment must be conducted in the Philippines under the supervision of an inspector.

(1) Size the fruit before treatment. Place temperature probes in the center of the large fruits.

(2) Raise the temperature of the fruit by saturated water vapor at 117.5 °F (47.5 °C) until the approximate center of the fruit reaches 114.8 °F (46 °C) within a minimum of 4 hours.

(3) Hold fruit temperature at 114.8 °F (46 °C) for 10 minutes.

(4) During the run-up time, temperature should be recorded from each pulp sensor once every 5 minutes. During the 10 minutes holding time, temperature should be recorded from each pulp sensor every minute. During the last hour of the treatment, which includes the 10-minute holding time, the relative humidity must be maintained at a level of 90 percent or higher. After the fruit are treated, air cooling and/or drench cooling are optional.

(c) *APHIS inspection.* Mangoes from the Philippines are subject to inspection under the direction of an inspector, either in the Philippines or at the port of first arrival in the United States. Mangoes inspected in the Philippines are subject to reinspection at the port of first arrival in the United States as provided in § 319.56–6.

(d) *Labeling.* Each box of mangoes must be clearly labeled in accordance with § 319.56–2(g). Shipments originating from approved areas other than Guimaras must be labeled “For distribution in Guam and Hawaii only.”

(e) *Phytosanitary certificate.* Mangoes originating from all approved areas must be accompanied by a phytosanitary certificate issued by the Republic of the Philippines Department of Agriculture that contains an additional declaration stating that the mangoes have been treated for fruit flies of the genus *Bactrocera* in accordance with paragraph (b) of this section. Phytosanitary certificates accompanying shipments of mangoes originating from the island of Guimaras
